

Feb 20,2018

To whomever it may concern

This refers to the recent request for a performance feedback from **Sahithi Adduri**. She has been working in **CloudIO India Private Limited** for nearly three years. I had the chance to directly over see her in a couple of projects from Sep 2017 to Jan 2018 for development & support of Breg Innercircle which is a web application and mobile friendly with remarkably easy to navigate and a flexible platform for the users developed by CloudIO for our customers. My interaction with her has been mainly through reporting of work done by her or on emails and sometimes code/design reviews.

Sahithi's scope of job were in the areas of analysing the business rules of the solution to come up with the technical design and code development. She always put in a lot of efforts to understand the dynamics of this business and technology.

Sahithi is very good in communication and works very efficiently in team oriented environments She has a good command over english language. She always expresses her views with a lot of conviction but at the same time has a flexible and pragmatic mindset which always open and improvising on new ideas and suggestions.

She also leads in organizational team building events which brings the team together improving the employee engagement.

I am confident that she will do exceptionally well given the nature of the program she wants to pursue, her career interests and her exceptionally diversified background. I recommend her with greatest enthusiasm and complete confidence and wish her luck in all her endeavours.

Should you have any questions, please contact us.

Sincerely

For **CloudIO India Private Limited**

Jaisooria Balakrishnan
